PROJECTS

Message Encryption using Stegnogarphy

Develop a system that encrypts a message, hides it within an image file using steganography, and allows the receiver to extract and decrypt the message. Combines encryption for message confidentiality and steganography to hide the message's existence.

Music Genre Classification Using Machine Learning

This project explores using machine learning (ML) to automatically classify music into different genres using the training datasets and then predicting the music genre for the test audio. It has various applications in music organization, recommendation systems, and streaming services.

Student Performance System Tracker Using Django

Prepared and served a variety of beverages with precision and creativity, consistently meeting or exceeding quality standards, and receiving compliments for latte art and presentation.

EDUCATION

Bachelor of Engineering (2021 - 2025)
Computer Science and Engineering
PES Institute of technology and management

PUC (2021)
Indian school Muscat (80%)

SSLC (2019)
Indian school Muscat (78.6%)
